

# Isolation Transwabs<sup>®</sup>

[www.mwe.co.uk](http://www.mwe.co.uk)

**Unique self-contained detection for  
Listeria, Salmonella, Coliform and Hygiene**

- Each test is entirely self-contained
- Rapid detection of pathogens
- Easy to use & easy to interpret
- Organisms remain viable for further testing, confirmation, investigation, etc

# Isolation Transwabs®

## Coliform Isolation Transwab®

For the early detection of coliforms and *E. coli* in the environment.

*Escherichia coli* and Coliforms are traditionally used as indicator organisms for faecal contamination in water and other environmental samples. Detection of these organisms usually points to poor hygiene at some stage in the production process or pollution of water at source.

Based on a traditional test for Coliforms, the **Coliform Isolation Transwab®** provides a simple method for detecting these organisms - showing a definite colour change from purple to yellow when coliforms are present.

## Listeria Isolation Transwab®

Easy to use early warning test for Listeria contamination in food production premises.

Easy-to-use and interpret.

Simple colour change indicates contamination.

No colour change means it's clear!

Self-contained swab test. No other reagents to add.

Ideal for control of critical points in the supply and manufacturing chain.

## Hygiene Swab™

### Same day results

Same day results from Hygiene Test make it possible for food manufacturers to avert potential major production loss by taking appropriate cleaning down procedures to reduce contamination of finished products.

### Rapid Screening

Hygiene Test is a rapid test which will detect gross bacterial and fungal contaminations of work surfaces, equipment machinery or other sampling sites.

### Helps improve hygiene standards

Regular use of Hygiene Test ensures the maintenance of high standards of general cleanliness in food manufacturing plants and catering establishments.

### Order Details

#### Product Ref.

MW503/25

MW504/25

MW570/25

#### Description

Coliform Isolation Transwab®

Hygiene Swab™

Listeria Isolation Transwab®

#### Unit size
