

3M Food Safety

Dear valued customer,

As a valued user of 3M Food Safety products, we want to ensure that you receive the quality and service expected from 3M.

Recently we have been made aware of attempts from non-3M authorised distributors, who offer our products to the market that are not meeting the high-quality standards we require. Most of the time these products are out of date or have been inappropriately stored. At 3M we have stringent product specification and production standards, which are some of the highest in the world. We would never supply any product that would fall below these strict standards which could affect the performance of our product. If you have any doubts or questions about the use, performance or storage of our products please contact the local 3M representative. We will be then able to help you to identify the right product for your use or link you to the authorised 3M distributor in your area. We will do our utmost to identify these companies and will take appropriate legal actions.

Our network of 3M Food Safety authorised distributors have to adhere to strict standards which will make sure that the 3M products you buy from them are of the correct quality and perform in the way they were designed to.

We value your business with us and want to be sure you are comfortable and secured with the use of 3M products. If you have any questions or concerns, please don't hesitate to make contact with your 3M representative.

Best regards,

Risto Rammul
3M North Europe Food Safety Leader
